

APPENDIX A

You will be asked to look up and enter your Census Tract Code, which represents a broad geographic area and is commonly used for research and statistical purposes. Census Tract Codes typically cover thousands of households.

Instructions: Follow the link to the FFIEC website <<https://geomap.ffiec.gov/ffiecgeomap/>> to find your Census Tract Code. Start typing your residential address, then copy and paste your Census Tract Code below.

Please see the example below. Please remember to return to this survey to enter your Tract Code number.

Please double-check that your number is entered correctly. If it's incorrect, your survey may not be eligible for compensation.

The screenshot shows the FFIEC Geocoding/Mapping System interface. At the top, there is a search bar with the FFIEC logo, a year dropdown set to 2025, and an address input field containing "1664 N. Virginia Street, Reno, NV 89557". Below the search bar, a table titled "Matched Address" displays the following information:

Matched Address	
Address	1664 N Virginia St, Reno, Nevada, 89557
MSA/MD Code	39900
State Code	32
County Code	031
Tract Code	0015.04
MSA/MD Name	RENO, NV
State Name	NEVADA
County Name	WASHOE COUNTY

To the right of the table is a map showing the location of the address. A red dot marks the address location. The map includes labels for "Ave" and "Ives Ave". A blue line on the map is labeled "0025.00" and "650".

The next question is shown in case the census tract number appears to be incomplete or mistyped. They're just a gentle backup to help us better understand your **general location**, if needed.
